QUADRABUILD

QUADRAPILE

A complete modular extension system installed within a week, with minimal disruption, built off-site or on-site in panel sections.

A helical piling system ideal for new build or remedial foundations, installed within a matter of hours.

Clean, efficient QuadraPile foundations installed prior to a quick, safe crane installation.

Installed with small, lightweight equipment making it ideal for restricted access sites.

Extension fitted out as you wish (bathroom, bedroom, sunroom etc.) with internal and external finishes as required.

Traditional pile and beam foundations.

Brick slips, render, timber, PVC and other cladding options also available.

Concrete free foundations for modular buildings and other structures.

✓ No mess foundations

✓ Clean, fast, efficient

✓ Ideal for limited access sites

QUADRAFIX

QUADRABASE

A masonry repair system suitable for structural problems, such as: subsidence, crack stitching, wall tie failure, lintel/arch failure and bowing walls.

A complete modular foundation and flooring system installed and ready for Structural Insulated Panels (SIPs) or timber frame within a few days.

QuadraFix system consists of:

Stainless steel helical reinforcing bar

Cementitious grout

QuadraPile foundations support the modular galvanised steel & timber perimeter beams & timber floor structure.

Structural repair of cracked brick, block or stone masonry.

Insulation within the floor gives excellent thermal performance.

Small or large, domestic or commercial properties.

The finished deck provides a clean, level surface on which to build.
