

### THE CHALLENGE

An NHS trust was in desperate need of additional office space for their London-based clinic. The yard at the rear of their building provided the opportunity to construct a new office building but posed several complexities:

- ⚙ The restricted site had limited access so all materials and equipment had to be carried in by hand.
- ⚙ Trees with preservation orders within the site had to be protected.
- ⚙ Disruption to the clinic had to be minimised.

### THE SOLUTION

We designed and installed a complete structure which consisted of QuadraPile helical pile foundations with a QuadraBase floor onto which off-site manufactured wall and roof panels were constructed.

✓ Minimal disruption

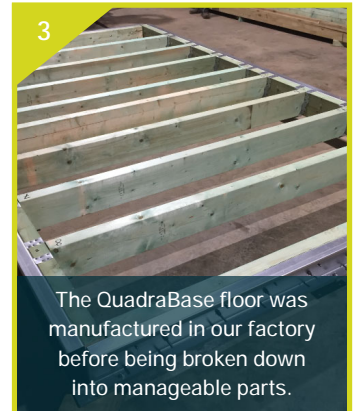

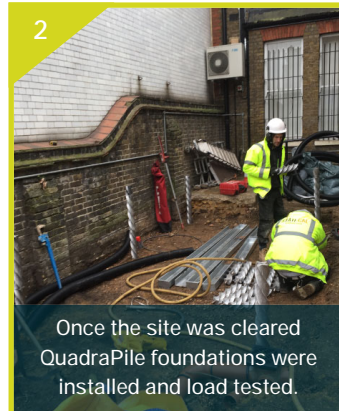

✓ Clean, fast, efficient

✓ No mess foundations

✓ Limited access sites

## QUADRABASE
